PROFESSIONAL SUMMARY

Junior front-end developer specializing in React, Next.js, and TypeScript. Focused on building responsive UI, clean component-driven architecture, and smooth interactive experiences. Strong in UI polish, maintainable CSS, and debugging. Projects and demos are available in my portfolio.

PROJECTS

Portfolio: just-0ne-guy.github.io/E-Portfolio/

Netflix Clone

Personal Project | React / Next.js, TypeScript   2025

Built a Netflix-style browsing experience with React/Next.js and TypeScript, focusing on responsive rows, smooth hover interactions, and polished UI transitions. Emphasized reusable components and consistent styling to create an app-like layout.

- Built a Netflix-style browsing UI with responsive rows, hover states, and smooth transitions
- Organized reusable components and consistent styling for a polished, app-like layout

X Clone

Personal Project | React / Next.js, TypeScript   2025

Created an X/Twitter-inspired interface using React and TypeScript, centered around a feed-style layout and post interactions. Focused on clean component structure, strong spacing/typography, and responsive behavior across devices.

- Built an X/Twitter-style interface focused on feed and post interactions
- Prioritized UX details like spacing, typography, and mobile responsiveness

Flixly API Project

Personal Project | React / Next.js   2025

Built Flixly, a movie-focused front-end experience with React, centered on clean layout, responsive design, and polished styling. Prioritized a smooth browsing flow and consistent UI across pages for an app-like feel.

- Built a responsive movie browsing interface with clean layout and consistent styling
- Improved UI structure and CSS consistency across the project for a polished experience

E-Commerce Site

Personal Project | React / Next.js   2025

Built a React-based e-commerce bookstore with product browsing and a checkout flow. Implemented pricing and sales display, reviews, and suggested books to create a realistic shopping experience.

- Built book browsing with pricing, sales, reviews, and suggested book recommendations
- Implemented checkout functionality and shopping flow to simulate a real storefront experience
